

Additional Rainfall Forecast

*****Extremely Dangerous Flood Event Unfolding*****

Flooding Impacts Include:

- Flooding prompting additional evacuations, and resulting in rescues
- Rapid rises in rivers and streams that overflow their banks in many places with deep flowing water
- Flood waters entering structures, and cutting-off people or communities with roads becoming flooded
- Road scours or complete failures along with the potential for sinkholes and earthen dam failures
- Low-lying bridge closures with some weakened or possibly washed away
- Hazardous materials or pollution in any flood waters
- Issues with the delivery of drinking water and sewer services

✓ Intense bands of rainfall will continue to move ashore creating excessive rainfall and further compounding the dangerous flooding situation occurring across the area. Based on 4 PM forecast data.
