System Pressure Advisory!

The water consumers of Bald Head Island Utilities, in Brunswick County are experiencing periods of low pressure and outages in the distribution system due to a 3” water main break on Red Cedar Trail, effecting (4) residential connections. Periods of low or no pressure in the distribution system increases the potential for back siphonage and introduction of bacteria into the water system.

Therefore, when water service is restored consumers are advised to **boil all water** used for human consumption (including drinking, making ice, brushing teeth, washing dishes and food preparation) or use bottled water.

Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water.

Water customers are strongly urged to conserve water whenever possible. This advisory remains in effect until further written notification is issued on the Village’s website.

This advisory issued on July 4, 2022 by:

JP McCann, Public Services Director
Bald Head Island Utilities
(910) 269-6483

[Insert the following paragraph, if recent historical data indicates nitrates have been detected in the source water at a level ≥ 9 mg/l]

Boiling water concentrates any levels of nitrates that may be present in the water. Infants below the age of six months and pregnant women should use an alternate water supply (e.g., bottled water) whenever possible.
