

The Village of Bald Head Island

Repost - Abandon Concrete Septic and Install Grinder Tank (Approximately 43 locations)

Date: 10/16/25

The Village of Bald Head Island is seeking bids to abandon the Concrete Septic tanks and install a grinder Tank at approximately 43 locations. Quotes should be returned to the contact information found below prior to 11/10/2025. Please contact the *Village Representative* (information below) to schedule a required walkthrough.

The bid should include all labor, and the Village will supply materials, the grinder pump. All electrical upgrades and connections will be completed before the start of this work and will NOT be the responsibility of the prospective bidder.

The work will include but not be limited to demo of existing concrete septic tank, fill with dirt, and cap lines. The contractor will install a Village- supplied grinder tank and snorkel with a vent. Plumbing from the house and the forced main side to the tank.

Each of the approximately 43 locations will be different, with some having challenging access and requiring homeowner contact and coordination with the Village. The bidder will be asked to give a unit price with the understanding that some locations may be more time-consuming than others.

The Village will be working with homeowners to upgrade electrical services between now and December 1, 2025. This work will start after the new year and must be completed on or before April 1st, 2026.
